PROFESSIONAL SUMMARY

WordPress Developer with 3+ years building WooCommerce stores, custom PHP plugins, and LifterLMS course platforms for agencies serving Indian and international clients. I default to solving problems with lean, maintainable PHP rather than stacking third-party plugins — it's faster to debug and cheaper to maintain long-term. Comfortable owning a build from Figma handoff through launch, performance tuning, and post-launch maintenance.

PROFESSIONAL HIGHLIGHTS

- 3+ years of hands-on WordPress & WooCommerce development across agency and client-facing roles
- Built custom LMS functionality — certificate automation, template customization, and dynamic student workflows — on LifterLMS
- Custom PHP plugin and shortcode development to replace paid/bloated third-party plugins
- End-to-end Figma-to-WordPress conversion, AJAX filtering, and dynamic API/CRM integrations

CORE TECHNICAL SKILLS

WordPress Development: WordPress (CMS), WooCommerce, LifterLMS, Elementor, Custom Plugin Development, Custom Shortcodes, Custom Theme Development, Child Themes, Custom Post Types & Taxonomies, Custom Meta Boxes, ACF (Advanced Custom Fields), Gutenberg Blocks, WordPress Hooks (Actions & Filters), Plugin Architecture, WordPress Security & Maintenance

Languages: PHP (Object-Oriented), JavaScript, HTML5, CSS3

Familiar With: React JS (basic/component-level)

Front-End Libraries: jQuery, Bootstrap 5, Tailwind CSS

Integrations: REST APIs, AJAX, Contact Form 7 (Dynamic Integrations), Payment Gateway Integration

Databases: MySQL

Tools: Git, VS Code, cPanel, phpMyAdmin, Postman

PROFESSIONAL EXPERIENCE

WordPress Developer — Hardy Infotech, Ahmedabad

September 2024 – April 2025

- Delivered custom WordPress and WooCommerce builds for agency clients, converting Figma designs into responsive, pixel-accurate Elementor pages.
- Built custom shortcodes and lightweight plugins in place of paid third-party plugins, cutting plugin-conflict risk and keeping sites faster and easier to maintain long-term.
- Developed AJAX-based filtering for product and content listings so results update instantly without a full page reload — a common ask from clients whose previous filter setup felt slow and clunky.
- Configured dynamic Contact Form 7 integrations to route leads directly into client CRM and email workflows, cutting manual lead-handling steps.

WordPress Developer — Elite Web Solution, Ahmedabad

March 2024 – July 2024

- Customized LifterLMS course and certificate templates for e-learning clients, aligning generated certificates with brand and accreditation requirements.

- Implemented WooCommerce customizations — product configuration, cart/checkout logic, and third-party payment gateway integration — to support client-specific sales flows.
- Converted Figma mockups into fully functional WordPress pages using Elementor and custom CSS, maintaining pixel accuracy across breakpoints.

WordPress Developer — Devstree IT Pvt. Ltd., Ahmedabad

April 2022 – February 2024

- Customized and built WordPress themes end-to-end for client websites — including a corporate site for AH Group's Afghanistan branch office and Devstree IT's own agency marketing site — aligning each with current design and UX standards.
- Reduced page load times by implementing caching, image compression, and front-end optimization techniques.
- Integrated third-party APIs and external services to extend site functionality across client projects.
- Partnered with the marketing team on on-page SEO implementation, contributing to improved organic search visibility.
- Owned website maintenance, security patching, and backup processes across multiple live client sites, maintaining uptime and data integrity.

Web Developer Intern — Devstree IT Pvt. Ltd., Ahmedabad

October 2021 – April 2022

- Resolved coding issues across live projects in collaboration with the development team, reducing bug backlog during the internship period.
- Integrated PHP-based back-end functionality with HTML, CSS, and JavaScript front ends under senior developer guidance.
- Contributed to internal documentation of project requirements, coding guidelines, and development best practices — used as onboarding reference for future interns.

EDUCATION

Bachelor of Engineering — Sanjayraj Education Zone

In Progress (2021 – Present)

Diploma in Computer Engineering — Government Polytechnic, Jamnagar

2018 – 2021 · CGPA: 8.11
